Topological Approach for Testing Equivalence in Heterogeneous Relational Databases	31
Algebra and Query Language for a Historical Data Model	33
The Nested Relation Type Model: An Application of Domain Theory to Databases	35
BRMQ: A Database Interface Facility based on Graph Traversals and Extended Relationships on Groups of Entities	37
Integrated Deductive Database System Implementation. A Systematic Study	41
Logical Optimisation of Distributed Knowledge Base Queries	43
An Evaluation of Site Selection Algorithms for Distributed Query Processing	45
Integrating Security with Fault-tolerant Distributed Databases	47
Efficient Schemes to Evaluate Transaction Performance in Distributed Database Systems	49
String Scanning in the Icon Programming Language	51
Events and Exception Handling in PS-algo	53
Structure Clashes - An Alternative to Program Inversion	55
Parameter Transmission Abstractions	57
Identification of Program Similarity in Large Populations	59
The Teaching Language Pascal-FC	61
CODIL: The Architecture of an Information Language	63
Modular Attribute Grammars	65
On Languages, Models and Programming Styles	67
A Proposed Standard for Measuring Crossword Compilation Efficiency	69
Lenient Execution and Concurrent Execution of Re-entrant Routines: Efficient Implementation in Data Flow Systems	71
ACLE: a Software Package for SIMD Computer Simulation	73
The Pebble-crunching Model for Fault-tolerant Load Balancing in Hypercube Ensembles	75
Competition: A Model of AND-Parallel Execution of Logic Programs	77
Scheduling of Precedence-Constrained Tasks on Multiprocessors	79
The RMIT Data Flow Computer: A Hybrid Architecture	81
A New Parallel Sorting Algorithm and its Efficient VLSI Implementation	83
Finding and Updating Depth-First Spanning Trees of Acyclic Digraphs in Parallel	85
On the Design of an Integrated Systolic Array for Solving Simultaneous Linear Equations	87
An Efficient Double Pipe Systolic Array for Matrix Product	89
Fundamentals of Pricing and Scheduling Computer Services and Investment in Computer Equipment	91
Reversing is Not Inherent in Lexicographical Permutation Generation	93
Implementation of Overlapping B-Trees for Time and Space Efficient Representation of Collections of Similar Files	95
A New HEAPSORT Algorithm and the Analysis of Its Complexity	97
A Secure Messaging Architecture Implementing the X.400-1988 Security Features	99
Bidirectional Huffman Coding	101
Pipelining Data Compression Algorithms	103
Performance Measurements on a 39 km Extended Ethernet	105
Short Circuits in Buffered Multi-stage Interconnection Networks	107
Applications of UET Scheduling Theory to the Implementation of Declarative Languages	109
PRAXIS: A Program for Reproducing Proforma Design Calculations	111
Structured Spanning Trees	113
Optimization Algorithms for Student Scheduling via Constraint Satisfaction	115
Cycle-Sort: A Linear Sorting Method	117
On Generating Random Permutations with Arbitrary Distributions	119
A Literal Code Method for Minimizing Boolean Functions	121
Scoping is not Orthogonal to Completeness	123
Tesseral Quaternions for the Octtree	125
A Note of the Optimal Labelling of Quadtree Nodes	127
Quadtree Algorithms for Contouring Functions of Two Variables	129
Yet More Circle Generators	131
Algorithms for Calculating Cubic Beta-Splines	133
Interpreting Technical Drawings	135
An Efficient Computational Geometry Method for Detecting Dotted Lines in Noisy Images	137
An Implementation of 7-bit Character Encoding for Standard Computer Graphics Environments	139
Separating Graphics from Application in the Design of User Interfaces	141
Development of Screen Management Subroutines Compatible with Microsoft FORTRAN Compiler	143
Kron's Method of Tearing on a Transputer Array	145
Continuations Implement Generators and Streams	147

T. H. Axford	Reference Counting of Cyclic Graphs for Functional Programs	466
A Andersson	A Note on the Expected Behaviour of Binary Tree Traversals	471
G. Alia and E. Martinelli	VLSI Binary-Residue Converters for Pipelined Processing	473
K. L. Clark	Parallel Logic Programming	482
K. Ueda and T. C. Chikayama	Design of the Kernel Language for the Parallel Inference Machine	494
I. Foster, C. Kesselman and S. Taylor	Concurrency: Simple Concepts and Powerful Tools	501
I Shizgal	The Amoeba-Prolog System	508
J. G. Wolff	Simplicity and Power - Some Unifying Ideas in Computing	518
K. G. Waugh, M. H. Williams, Q. Kong, S. Salvini and G. Chen	Designing SQUIRREL: an Extended SQL for a Deductive Database System	535
N. W. Paton and P. M. D. Gray	Optimising and Executing DAPLEX Queries using Prolog	547
H. J. Roberts	Expert Systems Clubs: Design Methods	556
G. M. Megson and D. J. Evans	A Systolic Array Solution for the Assignment Problem	562
T. Y. Chen	On the Consistency of Multi-valued Functions	570
